

GEN AI ARCHITECT COURSE:
WEEK 2 – 50 PROMPT SUBMISSION

A. Basic Prompt Templates

1. General inquiry:

Explain "Artificial Intelligence" in simple terms

Role (R):

AI Tutor for beginners

Task (T):

Explain Artificial Intelligence in simple and easy-to-understand language

Context (C):

The audience has little to no technical knowledge and needs a beginner-friendly explanation with examples

Few Shot (F):

Example: "AI is like teaching computers to think and learn similar to humans."

Report (R):

The explanation should be short, clear, simple, and include real-life examples

Final Prompt based on R+T+C+F+R Framework:

Act as an AI tutor for beginners. Explain "Artificial Intelligence" in very simple terms for someone with no technical background. Use easy language, short sentences, and include 2–3 real-life examples such as voice assistants, recommendations, or self-driving cars. Keep the explanation concise and beginner-friendly.

2. Summarisation:

Summarize the following text in 3 bullet points:

Machine Learning is a branch of artificial intelligence that enables computers to learn from data and improve their performance without being explicitly programmed. It uses algorithms and statistical models to identify patterns and make decisions automatically. Machine learning is widely used in applications such as speech recognition, recommendation systems, and self-driving cars. There are three main types of machine learning: supervised learning, unsupervised learning, and reinforcement learning. In supervised learning, models are trained using labeled data to predict outcomes accurately. Unsupervised learning helps discover hidden patterns or groupings in data without predefined labels. Reinforcement learning allows machines to learn through rewards and penalties based on their actions. Machine learning has transformed industries like healthcare, finance, education, and entertainment. It helps businesses analyze large amounts of data quickly and make better decisions. As technology advances, machine learning continues to play an important role in shaping the future of innovation and automation.

Role (R):

Professional Text Summarizer

Task (T):

Summarize the given passage into exactly 3 bullet points

Context (C):

The text explains machine learning, its types, applications, and impact on industries

Few Shot (F):

Example: “• Machine learning enables computers to learn from data automatically.”

Report (R):

The summary should be concise, informative, and easy to understand while covering the key ideas

Final Prompt based on R+T+C+F+R Framework:

Act as a professional text summarizer. Read the given passage about machine learning and summarize it into exactly 3 clear and concise bullet points. Include the main idea, key types of machine learning, and its real-world applications and impact. Use simple and easy-to-understand language.

3. Paraphrasing:

Rewrite the sentence in your own words:

Sentence: Machine Learning is a branch of artificial intelligence that enables computers to learn from data and improve their performance without being explicitly programmed.

Role (R):

English Language Paraphrasing Expert

Task (T):

Rewrite the given sentence in different words without changing its meaning

Context (C):

The sentence explains machine learning and should remain simple, clear, and accurate after paraphrasing

Few Shot (F):

Example: "AI helps computers perform tasks that normally require human intelligence." →
"Artificial intelligence allows computers to complete tasks that usually need human thinking."

Report (R):

The rewritten sentence should maintain the original meaning while improving readability and using simple language

Final Prompt based on R+T+C+F+R Framework:

Act as an English language paraphrasing expert. Rewrite the given sentence in your own words without changing its original meaning. Use simple, clear, and natural language while maintaining accuracy and readability.

4. Definition Request:

What is the meaning of “Deep Learning”:

Role (R):

Technology Educator

Task (T):

Define and explain the meaning of Deep Learning in simple terms

Context (C):

The audience is beginners with little technical knowledge and needs a clear and basic understanding of the concept

Few Shot (F):

Example: “Machine Learning allows computers to learn from data without direct programming.”

Report (R):

The explanation should be brief, beginner-friendly, and include a simple real-world example if possible

Final Prompt based on R+T+C+F+R Framework:

Act as a technology educator for beginners. Explain the meaning of “Deep Learning” in simple and easy-to-understand language. Keep the explanation short, clear, and beginner-friendly, and include a simple real-world example if relevant.

5. Comparison:

Compare Artificial Intelligence and Machine Learning based on Salaries by Profession

Role (R):

Career and Technology Analyst

Task (T):

Compare Artificial Intelligence and Machine Learning professions based on salary levels

Context (C):

The comparison should help readers understand differences in salary, job roles, and earning potential in AI and ML careers

Few Shot (F):

Example: "AI Engineers generally earn higher salaries due to broader responsibilities in intelligent system development."

Report (R):

The response should be concise, structured, and include a clear comparison in simple language, preferably in table format

Final Prompt based on R+T+C+F+R Framework:

Act as a career and technology analyst. Compare Artificial Intelligence and Machine Learning professions based on salaries, job roles, and earning potential. Present the comparison in a clear and concise table format using simple and easy-to-understand language. Include key differences and similarities between AI and ML career path

B. Persona-Based Prompt Templates

6. Role + Explanation

You are a Baker. Explain the concept of making cake to beginners:

Role (R):

Professional Baker and Cooking Instructor

Task (T):

Explain the process of making a cake to beginners

Context (C):

The audience has no baking experience and needs simple step-by-step guidance using easy language

Few Shot (F):

Example: "First, mix flour, sugar, eggs, and butter to prepare the cake batter."

Report (R):

The explanation should be beginner-friendly, clear, short, and include the basic steps of cake making

Final Prompt based on R+T+C+F+R Framework:

Act as a professional baker and cooking instructor. Explain the concept and basic process of making a cake to beginners using simple and easy-to-understand language. Provide step-by-step instructions briefly, including ingredients preparation, mixing, baking, and decorating. Keep the explanation clear and beginner-friendly.

7. Style Mimicry

Write like Shakespeare: "The beauty of moon"

Role (R):

Creative Writer in Shakespearean Style

Task (T):

Write about "The beauty of moon" in a Shakespeare-inspired style

Context (C):

The writing should resemble old poetic English with dramatic and artistic expressions similar to Shakespeare's tone

Few Shot (F):

Example: "O radiant moon, thou silver queen of night, thy glow doth calm the restless soul."

Report (R):

The output should be poetic, expressive, and elegant while maintaining a Shakespeare-like writing style

Final Prompt based on R+T+C+F+R Framework:

Act as a creative writer inspired by Shakespeare. Write a short poetic passage about "The beauty of moon" using Shakespearean-style language, elegant expressions, and dramatic imagery. Keep the writing artistic, expressive, and concise.

8. Professional Writing

You are a Movie Reviewer. Write a Review for the movie “Swapped”

Role (R):

Professional Movie Reviewer

Task (T):

Write a review of the movie “Swapped”

Context (C):

The review should sound professional, balanced, and suitable for a general audience, covering plot impression, performance, and overall opinion

Few Shot (F):

Example: “The film delivers a gripping storyline with strong performances, though the pacing slows in parts.”

Report (R):

The review should be concise, structured, and include a brief opinion on strengths and weaknesses

Final Prompt based on R+T+C+F+R Framework:

Act as a professional movie reviewer. Write a concise and balanced review of the movie “Swapped” for a general audience. Include a brief overview of the storyline, acting performance, direction, and overall viewing experience. Highlight both strengths and weaknesses in a clear and professional tone.

C. Few-Shot Prompt Templates

9. Classification Template

Classify sentiment:

[I love ice cream] — [Positive]

[I hate fast food] — [Negative]

[NewInput] –

Role (R):

Sentiment Classification Expert

Task (T):

Classify the sentiment of a given input as Positive, Negative, or Neutral

Context (C):

The input will be a short sentence expressing an opinion, emotion, or attitude

Few Shot (F):

Example 1:

“I love ice cream” → Positive

Example 2:

“I hate fast food” → Negative

Report (R):

The output should return only the correct sentiment label (Positive / Negative / Neutral) based on the input

Final Prompt based on R+T+C+F+R Framework:

Act as a sentiment classification expert. Classify the sentiment of the given input sentence as Positive, Negative, or Neutral. Use the examples as guidance. Respond with only one label as the output.

10. Translation Template

Translate the following sentences into Tamil:

English Sentence: Machine learning has transformed industries like healthcare, finance, education, and entertainment.

Role (R):

Professional Translator (English to Tamil)

Task (T):

Translate the given English sentence into Tamil accurately

Context (C):

The translation should preserve meaning and be suitable for general readers with clear and natural Tamil language

Few Shot (F):

Example:

“Artificial Intelligence is changing the world.” → “செயற்கை நுண்ணறிவு உலகத்தை மாற்றி வருகிறது.”

Report (R):

The output should be a correct, fluent, and natural Tamil translation of the given sentence

Final Prompt based on R+T+C+F+R Framework:

Act as a professional translator from English to Tamil. Translate the given sentence into clear and natural Tamil while preserving its original meaning and tone.

11. Question Answering Template

Answer these questions: Who wrote "Romeo and Juliet"? — William Shakespeare

What is the capital of France? — Paris

Who discovered gravity? — __

Role (R):

General Knowledge Question Answering Expert

Task (T):

Answer the given general knowledge questions accurately

Context (C):

The questions are factual and require short, direct answers similar to the examples provided

Few Shot (F):

Example 1: Who wrote "Romeo and Juliet"? → William Shakespeare

Example 2: What is the capital of France? → Paris

Report (R):

The response should provide only the correct and concise answer without extra explanation

Final Prompt based on R+T+C+F+R Framework:

Act as a general knowledge question answering expert. Answer the given questions accurately using short and direct responses. Follow the format shown in the examples and provide only the final answer without explanation.

D. Chain-of-Thought (CoT) Templates

12. Step-by-Step Reasoning

Let's think step by step. [Problem statement]. First, we [step 1], then [step 2], so finally [conclusion].

Example: Let's think step by step. If a train travels at 60 km/h for 3 hours, how far does it go?

Role (R):

Step-by-Step Reasoning Assistant

Task (T):

Solve problems using clear step-by-step reasoning

Context (C):

The input will be a simple word problem requiring logical or mathematical reasoning

Few Shot (F):

Example:

Let's think step by step. If a train travels at 60 km/h for 3 hours, how far does it go?

First, multiply speed and time, then $60 \times 3 = 180$, so finally the distance is 180 km.

Report (R):

The solution should be structured, easy to follow, and clearly show each reasoning step leading to the final answer

Final Prompt based on R+T+C+F+R Framework:

Act as a step-by-step reasoning assistant. Solve the given problem clearly by breaking it into logical steps. First explain the process step by step, then provide the final answer in a simple and easy-to-understand manner.

13. Math Problem Solving

Solve this math problem by showing your work: if $a-6b+6c=4$ and $6a+3b-3c=50$, where a , b and c are real numbers, the values of $2a+3b-3c$ is

Role (R):

Mathematics Problem Solver

Task (T):

Solve the given system of equations and find the value of a target expression

Context (C):

The problem involves linear equations with real numbers and requires algebraic manipulation to find $2a + 3b - 3c$

Few Shot (F):

Example:

If $x + y = 10$ and $x - y = 2$, then adding gives $2x = 12$, so $x = 6$

Report (R):

The solution should show clear algebraic steps leading to the final numerical answer

Final Prompt based on R+T+C+F+R Framework:

Act as a mathematics problem solver. Solve the given system of linear equations step by step and find the value of the expression $2a + 3b - 3c$. Show all working clearly using proper algebraic steps and provide the final answer.

14. Logical Puzzle Solve the following logic puzzle.

Show your reasoning process: In a pond, there are three ducks in a row:

- Two ducks are in front of a duck.
- Two ducks are behind a duck.
- There is a duck in the middle.

The Question:

How many ducks are in the pond in total?

Role (R):

Logical Reasoning Puzzle Solver

Task (T):

Solve the given logic puzzle and determine the total number of ducks

Context (C):

The puzzle involves positional clues about ducks in a pond that may seem contradictory but requires logical interpretation

Few Shot (F):

Example:

Clue: Two people are ahead of a person and two are behind → Total is 3 people in a line

Report (R):

The solution should be logically reasoned, concise, and clearly state the final answer

Final Prompt based on R+T+C+F+R Framework:

Act as a logical reasoning puzzle solver. Carefully analyze the given clues about ducks in a pond and determine the total number of ducks. Use logical interpretation of positions and explain the reasoning briefly before giving the final answer.

E. Instruction Tuning/ Format Control

15. Output Formatting Summarize the article below in exactly 2 bullet points.

Rainwater harvesting is a method of collecting and storing rainwater for later use instead of letting it flow away as runoff. It helps conserve water and reduces dependence on groundwater and municipal water supply. The collected rainwater can be stored in tanks or directed to recharge underground aquifers. This practice is especially useful in areas facing water scarcity or irregular rainfall. It also helps reduce flooding and soil erosion by controlling surface water flow. Rainwater harvesting is an eco-friendly and sustainable way to manage water resources efficiently.

Role (R):

Structured Output Formatting Expert

Task (T):

Summarize the given passage into exactly 2 bullet points

Context (C):

The passage explains rainwater harvesting, its process, benefits, and environmental importance

Few Shot (F):

Example:

- Key idea of the topic
- Main benefits or applications

Report (R):

The output must strictly contain only 2 clear, concise bullet points covering the most important ideas

Final Prompt based on R+T+C+F+R Framework:

Act as a structured output formatting expert. Read the given passage and summarize it into exactly 2 concise bullet points. Ensure the first bullet captures the main idea of rainwater harvesting and the second bullet highlights its key benefits and importance. Keep the output clear, simple, and strictly limited to two points.

16. Table Generation

Create a table comparing CA, CFA and ACCA based on no of years, difficulty level and salary:

Role (R):

Career Education Data Analyst

Task (T):

Create a comparison table for CA, CFA, and ACCA based on duration, difficulty, and salary

Context (C):

The comparison is for students exploring professional finance qualifications and should be easy to understand

Few Shot (F):

Example:

Course Duration Difficulty Salary

CA	4–5 years	High	High
----	-----------	------	------

Report (R):

The table should be simple, structured, and clearly compare all three qualifications

Final Prompt based on R+T+C+F+R Framework:

Act as a career education data analyst. Create a clear comparison table for CA, CFA, and ACCA based on duration (number of years), difficulty level, and average salary. Present the information in a neat table format that is easy for students to understand and compare.

17. Email Writing

Write a professional email to my Manager regarding Adjournment of the Investors Meeting due to the non-availability of the Lead investor. Use a formal tone.

Role (R):

Professional Corporate Email Writer

Task (T):

Write a formal email to a manager requesting adjournment of an investors meeting

Context (C):

The meeting needs to be postponed due to the unavailability of the lead investor, and the tone must remain polite and professional

Few Shot (F):

Example: "Dear Sir, I would like to inform you that the scheduled meeting needs to be postponed due to unforeseen circumstances."

Report (R):

The email should include a subject line, clear reason for adjournment, polite tone, and professional closing

Final Prompt based on R+T+C+F+R Framework:

Act as a professional corporate email writer. Write a formal email to my manager requesting the adjournment of the Investors Meeting due to the non-availability of the lead investor. Use a polite and professional tone, include a clear subject line, briefly explain the reason for postponement, and end with a courteous closing.

F. Contextual Prompts

18. Tailored Explanation

Explain blockchain to a high school student who understands basic computer science.

Role (R):

Computer Science Educator

Task (T):

Explain blockchain in a simple way tailored to a high school student

Context (C):

The student has basic computer science knowledge but is new to blockchain and needs an easy conceptual explanation

Few Shot (F):

Example: "Blockchain is like a shared digital notebook that many computers keep together and cannot easily change."

Report (R):

The explanation should be simple, relatable, and include an easy analogy or example

Final Prompt based on R+T+C+F+R Framework:

Act as a computer science educator. Explain "blockchain" to a high school student who has basic computer science knowledge. Use simple language and include an easy analogy or real-world example (such as a shared notebook or digital ledger). Keep the explanation clear, short, and easy to understand.

19. Industry-Specific Context

As an Automation Engineer, explain how AI automation impacts various service industries.

Role (R):

Automation and AI Industry Expert (Automation Engineer)

Task (T):

Explain the impact of AI automation on service industries

Context (C):

The explanation should be from an automation engineering perspective and focus on real-world service industries like banking, healthcare, retail, and customer support

Few Shot (F):

Example: "In banking, AI automation helps in fraud detection and faster customer service through chatbots."

Report (R):

The response should be structured, simple, and highlight key industry impacts with brief examples

Final Prompt based on R+T+C+F+R Framework:

Act as an automation engineer. Explain how AI-driven automation impacts various service industries such as banking, healthcare, retail, and customer support. Provide simple explanations with real-world examples for each industry, focusing on efficiency, cost reduction, and improved customer experience. Keep the response clear and structured.

G. Creative Writing Prompts

20. Story Writing

Write a short story about A who wants to study abroad but faces financial difficulties.

Role (R):

Creative Story Writer

Task (T):

Write a short story based on the given theme

Context (C):

The story is about a character "A" who dreams of studying abroad but struggles with financial difficulties

Few Shot (F):

Example: "A dreamed of going to London for higher studies, but limited finances made it seem impossible."

Report (R):

The story should be short, emotional, clear, and have a simple narrative arc with a hopeful tone

Final Prompt based on R+T+C+F+R Framework:

Act as a creative story writer. Write a short and emotional story about a character named "A" who wants to study abroad but faces financial difficulties. Include the character's dream, struggle, challenges, and a hopeful or meaningful resolution. Keep the language simple, engaging, and concise.

21. Poem Writing

Write a poem in Sonnet Form about “Rainbow”

Role (R):

Poet (Sonnet Specialist)

Task (T):

Write a sonnet poem about a rainbow

Context (C):

The poem must follow the sonnet structure (14 lines) and express beauty, symbolism, and imagery of a rainbow in a poetic style

Few Shot (F):

Example line: “A rainbow blooms where stormy skies depart”

Report (R):

The output should be a structured 14-line sonnet with lyrical, vivid, and emotional language

Final Prompt based on R+T+C+F+R Framework:

Act as a poet specializing in sonnets. Write a 14-line sonnet poem about a rainbow. Use vivid imagery, emotional expression, and poetic language to describe its beauty and symbolism. Ensure the structure follows traditional sonnet form and remains lyrical and meaningful.

22. Dialogue Writing

Write a realistic dialogue between Person A and Person B discussing their performance in Board exams:

Role (R):

Dialogue Writing Expert

Task (T):

Write a realistic dialogue between two people discussing their board exam performance

Context (C):

The conversation is between Person A and Person B, who are students discussing their exam results, feelings, and future plans

Few Shot (F):

Example:

A: How did your exams go?

B: I think I did well in most subjects, but maths was tough.

Report (R):

The dialogue should be natural, simple, and conversational, reflecting student emotions and experiences

Final Prompt based on R+T+C+F+R Framework:

Act as a dialogue writing expert. Write a realistic and natural conversation between Person A and Person B discussing their performance in board exams. Include their feelings, exam experience, strengths, weaknesses, and future expectations. Keep the tone simple, relatable, and conversational.

H. Code & Technical Prompts

23. Code Generation

Write a Python function that can perform arithmetical operations like a calculator:

Role (R):

Python Programming Expert

Task (T):

Write a Python function that performs basic arithmetic operations like a calculator

Context (C):

The function should support operations such as addition, subtraction, multiplication, and division based on user input

Few Shot (F):

Example: `calculate(5, 2, "+")` → 7

Report (R):

The code should be simple, clean, and correctly handle basic arithmetic operations including division edge cases

Final Prompt based on R+T+C+F+R Framework:

Act as a Python programming expert. Write a function named `calculate` that acts like a basic calculator. It should take two numbers and an operator (+, -, *, /) as input and return the correct result. Ensure the code is simple, readable, and handles basic edge cases like division by zero.

24. Debugging

Help Here is some code. Find and fix any errors: [code snippet]

Role (R):

Python Debugging Expert

Task (T):

Identify and fix errors in the given code snippet

Context (C):

The code may contain syntax, logical, or runtime errors and needs correction with explanation

Few Shot (F):

Example:

Incorrect: print("Hello

Correct: print("Hello")

Report (R):

The response should provide corrected code and briefly mention what was fixed

Final Prompt based on R+T+C+F+R Framework:

Act as a Python debugging expert. Carefully examine the given code snippet, identify any syntax, logical, or runtime errors, and provide the corrected version of the code. Also briefly explain what was wrong and how it was fixed in a simple and clear manner.

25. API Documentation

Explain how to use the [API name] with an example request and response.

Role (R):

API Documentation Specialist

Task (T):

Explain how to use a given API with example request and response

Context (C):

The explanation should help developers understand how to call the API, including request format, parameters, and sample response

Few Shot (F):

Example:

Request: GET /users/1

Response: { "id": 1, "name": "John" }

Report (R):

The output should be structured, clear, and developer-friendly with simple explanation and example

Final Prompt based on R+T+C+F+R Framework:

Act as an API documentation specialist. Explain how to use the given API, including endpoint usage, required parameters, and authentication if needed. Provide a clear example of an API request and a sample response in a structured format. Keep the explanation simple and developer-friendly.

I. Marketing & Business Prompts

26. Ad Copywriting

Write a compelling ad for “Ice Cream” targeting “Children”.

Role (R):

Creative Advertising Copywriter

Task (T):

Write a compelling advertisement for ice cream targeting children

Context (C):

The ad should be fun, engaging, and appealing to kids using simple, playful language

Few Shot (F):

Example: “Cool down with the yummiest ice cream in town—every scoop is a happy treat!”

Report (R):

The output should be short, catchy, and emotionally appealing to children with a fun tone

Final Prompt based on R+T+C+F+R Framework:

Act as a creative advertising copywriter. Write a fun and engaging advertisement for ice cream targeted at children. Use simple, playful, and exciting language that attracts kids’ attention. Make it catchy, cheerful, and emotionally appealing, highlighting taste, joy, and fun experience.

27. Product Description

Write a persuasive product description for Electric toothbrush:

Role (R):

E-commerce Copywriter

Task (T):

Write a persuasive product description for an electric toothbrush

Context (C):

The description should attract customers and highlight benefits like oral hygiene, ease of use, and modern features

Few Shot (F):

Example: "Experience a deeper clean with advanced brushing technology designed for healthier teeth and gums."

Report (R):

The output should be concise, engaging, and persuasive, focusing on benefits and user experience

Final Prompt based on R+T+C+F+R Framework:

Act as an e-commerce copywriter. Write a persuasive product description for an electric toothbrush. Highlight its key benefits such as improved oral hygiene, advanced cleaning technology, ease of use, and comfort. Use engaging and convincing language that encourages customers to buy the product.

28. Social Media Post

Create a social media post promoting “Save Environment Event” in a friendly tone.

Role (R):

Social Media Content Creator

Task (T):

Create a friendly social media post promoting a “Save Environment” event

Context (C):

The post should encourage participation, raise awareness about environmental protection, and use an engaging and positive tone

Few Shot (F):

Example: “Join us this weekend to make our planet greener and cleaner—every small action counts!”

Report (R):

The output should be short, catchy, motivational, and suitable for platforms like Instagram or Facebook

Final Prompt based on R+T+C+F+R Framework:

Act as a social media content creator. Write a friendly and engaging social media post promoting a “Save Environment” event. Encourage people to participate, raise awareness about protecting nature, and use a positive, motivational tone. Keep it short, catchy, and suitable for social media platforms like Instagram or Facebook.

J. Customer Support & Service Prompts

29. Response to Complaint

Respond professionally to this customer complaint: A customer who complains that his Laptop is not getting switched on.

Role (R):

Customer Support Representative

Task (T):

Write a professional response to a customer complaint

Context (C):

The customer reports that their laptop is not turning on, and the response should be polite, helpful, and solution-oriented

Few Shot (F):

Example: "We're sorry for the inconvenience. Please try charging your device and checking the power adapter connection."

Report (R):

The response should acknowledge the issue, show empathy, and provide basic troubleshooting steps in a professional tone

Final Prompt based on R+T+C+F+R Framework:

Act as a customer support representative. Write a professional and polite response to a customer who is facing an issue where their laptop is not switching on. Acknowledge the problem, express empathy, and provide simple troubleshooting steps such as checking the charger, power button, and battery connection. Offer further assistance if the issue persists.

30. FAQ Generator

Generate 5 common FAQs and answers for “Instant Dosa batter”

Role (R):

Content and FAQ Specialist

Task (T):

Generate 5 common FAQs with answers for instant dosa batter

Context (C):

The FAQs should help customers understand usage, storage, preparation, and benefits of instant dosa batter

Few Shot (F):

Example:

Q: How do I use instant dosa batter?

A: Just pour, spread on a pan, and cook until crispy.

Report (R):

The output should include 5 clear and practical FAQs with short, easy-to-understand answers

Final Prompt based on R+T+C+F+R Framework:

Act as a content and FAQ specialist. Generate 5 common frequently asked questions (FAQs) with clear and simple answers for “Instant dosa batter.” Cover topics like usage, storage, preparation method, shelf life, and benefits. Keep the questions practical and answers concise and user-friendly.

K. Education & Tutoring Prompts

31. Lesson Plan Creation

Create a lesson plan for teaching “Artificial Intelligence” to Grade: III children

Role (R):

Primary School Curriculum Designer

Task (T):

Create a simple lesson plan to teach Artificial Intelligence to Grade 3 students

Context (C):

The learners are very young (Grade 3), so the content must be extremely simple, fun, and activity-based with real-life examples

Few Shot (F):

Example: “AI is like a smart robot that can help us do small tasks like talking or recognizing pictures.”

Report (R):

The lesson plan should include objective, simple explanation, activity, and short assessment in an easy format

Final Prompt based on R+T+C+F+R Framework:

Act as a primary school curriculum designer. Create a simple and engaging lesson plan to teach “Artificial Intelligence” to Grade 3 students. Use very basic language and relatable examples like smart assistants or robots. Include learning objectives, a short explanation, one fun classroom activity, and a simple assessment to check understanding. Keep it child-friendly and interactive.

32. Quiz Generation

Generate a 5-question quiz about “Bio Degradable waste”

Role (R):

Educational Quiz Designer

Task (T):

Create a 5-question quiz on biodegradable waste

Context (C):

The quiz is for general learners and should test basic understanding of biodegradable waste, examples, and environmental importance

Few Shot (F):

Example:

Q: What is biodegradable waste?

A: Waste that can be broken down naturally by microorganisms.

Report (R):

The output should include 5 clear questions with multiple-choice or short answers and simple language

Final Prompt based on R+T+C+F+R Framework:

Act as an educational quiz designer. Create a 5-question quiz on “Biodegradable waste.” Include simple and clear questions with either multiple-choice or short-answer format. Cover definition, examples, decomposition process, and environmental importance. Keep the language easy for general learners.

33. Homework Help

Explain how to solve this problem on calculus

Role (R):

Calculus Tutor

Task (T):

Explain how to solve a calculus problem step by step

Context (C):

The student needs homework help and may have basic understanding of calculus, so the explanation should be simple and guided

Few Shot (F):

Example: "To differentiate x^2 , we use the power rule: bring the power down and reduce it by 1."

Report (R):

The explanation should be clear, step-by-step, and easy to follow with proper reasoning

Final Prompt based on R+T+C+F+R Framework:

Act as a calculus tutor. Explain how to solve the given calculus problem step by step in a simple and easy-to-understand manner. Break the solution into clear steps and explain the reasoning behind each step so that a student can easily follow and learn the method.

L. Advanced Framework-Based Templates

34. ReAct Framework

Thought: [model thinks about what to do next]

Action: [model takes an action]

Observation: [result of the action]

Answer: [final answer] Simulate agent behavior manually.

Role (R):

ReAct Framework Simulation Agent

Task (T):

Simulate a reasoning agent using Thought–Action–Observation–Answer structure

Context (C):

The response should demonstrate step-by-step agent-like reasoning for a generic problem-solving scenario

Few Shot (F):

Example:

Thought: I need to calculate the total cost.

Action: Multiply price by quantity.

Observation: Result is 100.

Answer: The total cost is 100.

Report (R):

The output should clearly separate reasoning steps and end with a final answer in structured format

Final Prompt based on R+T+C+F+R Framework:

Act as a ReAct framework simulation agent. For the given problem, reason step by step using the format Thought, Action, Observation, and Answer. Clearly show the reasoning process, the action taken, the result observed, and then provide the final answer in a structured manner.

35. Tree of Thoughts (ToT)

Generate 3 possible solutions to reduce Global Warming.

Evaluate each and choose the best one.

Role (R):

Environmental Strategy Analyst (Tree of Thoughts Specialist)

Task (T):

Generate multiple solutions for reducing global warming, evaluate them, and select the best one

Context (C):

The problem involves global warming, requiring practical environmental, technological, and policy-based solutions

Few Shot (F):

Example:

Solution 1: Plant more trees → High impact, low cost

Solution 2: Use electric vehicles → Medium impact, medium cost

Solution 3: Renewable energy adoption → Very high impact, high cost

Report (R):

The output should include 3 solutions, brief evaluation of each, and a clear justification for the best choice

Final Prompt based on R+T+C+F+R Framework:

Act as an environmental strategy analyst using the Tree of Thoughts approach. Generate 3 possible solutions to reduce global warming. Evaluate each solution based on impact, feasibility, and cost. Then compare them and clearly select the best solution with a short justification for your choice.

36. Self-Consistency Prompting

Solve the following question in 3 different ways and pick the most consistent answer: “reduce Global Warming”

Role (R):

Environmental Analysis Expert (Self-Consistency Reasoning Specialist)

Task (T):

Generate multiple independent solution paths to reduce global warming and select the most consistent answer

Context (C):

The problem requires exploring different approaches to global warming reduction, such as policy, technology, and lifestyle changes

Few Shot (F):

Example:

Way 1: Plant trees → absorbs CO₂ → effective

Way 2: Reduce fossil fuels → lowers emissions → highly effective

Way 3: Use solar energy → clean energy → very effective

Consistent conclusion: Reduce fossil fuel usage and adopt renewables

Report (R):

The response should show 3 distinct reasoning approaches and conclude with the most consistent and reliable solution

Final Prompt based on R+T+C+F+R Framework:

Act as an environmental analysis expert using self-consistency prompting. Solve the problem of reducing global warming in 3 different ways. Compare the reasoning from each approach and identify the most consistent and effective solution. Clearly explain why the final answer is the most reliable choice.

M. Prompt Optimization & Evaluation

37. Prompt Refinement

Improve this prompt: "[Original prompt]"

Make it clearer, more specific, and structured.

Role (R):

Prompt Engineering Expert

Task (T):

Improve and refine a given prompt to make it clearer, more specific, and well-structured

Context (C):

The original prompt may be vague, incomplete, or poorly structured and needs optimization for better AI performance

Few Shot (F):

Example:

Original: "Write about dogs"

Improved: "Write a 150-word informative paragraph about dogs, including their characteristics, behavior, and why they are popular pets."

Report (R):

The output should include a clearly improved version of the prompt with better clarity, structure, and specificity

Final Prompt based on R+T+C+F+R Framework:

Act as a prompt engineering expert. Improve the given prompt by making it clearer, more specific, and well-structured. Ensure the refined prompt removes ambiguity and clearly defines the role, task, and expected output format for better AI performance.

38. Prompt Grading Rubric

Rate this output based on the following criteria (1-5): Relevance: Accuracy: Clarity: Fluency: Creativity: Final Score:

Role (R):

Prompt Evaluation and Grading Expert

Task (T):

Evaluate and rate a given output using defined criteria

Context (C):

The output should be assessed based on relevance, accuracy, clarity, fluency, and creativity using a 1–5 scale

Few Shot (F):

Example:

Relevance: 4

Accuracy: 5

Clarity: 4

Fluency: 5

Creativity: 3

Final Score: 4.2

Report (R):

The response should provide individual scores for each criterion and a final average score

Final Prompt based on R+T+C+F+R Framework:

Act as a prompt evaluation expert. Rate the given output based on the following criteria: Relevance, Accuracy, Clarity, Fluency, and Creativity, each on a scale of 1 to 5. Then compute and provide the final average score. Present the evaluation in a clear and structured format.

39. Prompt Iteration Challenge

Take this weak prompt: "[Prompt]"

Now rewrite it 3 times to improve clarity and effectiveness.

Role (R):

Prompt Engineering Specialist

Task (T):

Rewrite a given weak prompt into 3 improved versions with increasing clarity and effectiveness

Context (C):

The original prompt is assumed to be vague or unclear and needs structured refinement for better AI performance

Few Shot (F):

Example:

Weak Prompt: "Explain AI"

Improved 1: "Explain Artificial Intelligence in simple terms."

Improved 2: "Explain Artificial Intelligence in simple terms with examples for beginners."

Improved 3: "Explain Artificial Intelligence in simple terms for beginners, including 2-3 real-life examples like voice assistants and self-driving cars."

Report (R):

The output should show 3 progressively improved versions of the prompt in a clear format

Final Prompt based on R+T+C+F+R Framework:

Act as a prompt engineering specialist. Take the given weak prompt and rewrite it three times to progressively improve clarity, specificity, and effectiveness. Each version should be clearer and more structured than the previous one, ensuring better AI understanding and response quality.

N. Real-World Application Prompts

40. Job Posting Creation

Write a job posting for Accountant at ABC Limited. Include responsibilities, requirements, and benefits.

Role (R):

HR Job Description Writer

Task (T):

Create a job posting for an Accountant position

Context (C):

The job is for ABC Limited and should include responsibilities, requirements, and benefits in a clear and structured format

Few Shot (F):

Example:

Responsibilities: Maintain financial records, prepare reports

Requirements: B.Com degree, 2+ years experience

Benefits: Health insurance, career growth

Report (R):

The output should be professional, well-structured, and suitable for a job advertisement

Final Prompt based on R+T+C+F+R Framework:

Act as an HR job description writer. Write a professional job posting for the position of Accountant at ABC Limited. Include clearly structured sections for Responsibilities, Requirements, and Benefits. Use simple, formal, and attractive language suitable for job seekers.

41. Resume Summary

Builder Create a professional summary for a resume based on the following details: [Experience, skills, achievements]

Role (R):

Professional Resume Writer

Task (T):

Create a professional resume summary based on given experience, skills, and achievements

Context (C):

The input will include a candidate's experience, skills, and achievements, and must be converted into a concise professional summary

Few Shot (F):

Example:

Input: 2 years experience in marketing, skills in SEO and content writing

Output: "Results-driven marketing professional with 2 years of experience in SEO and content writing, skilled in improving online visibility and engagement."

Report (R):

The output should be short, impactful, and suitable for a resume summary section

Final Prompt based on R+T+C+F+R Framework:

Act as a professional resume writer. Create a concise and impactful professional summary based on the given experience, skills, and achievements. Highlight key strengths, expertise, and career value in a clear and professional tone suitable for a resume.

42. Business Proposal

Write a proposal for “Recycling Plastic Waste” to investor. Include objectives, methodology, and benefits

Role (R):

Business Proposal Writer

Task (T):

Write a business proposal for a plastic waste recycling project

Context (C):

The proposal is intended for investors and must include objectives, methodology, and benefits of the project in a professional tone

Few Shot (F):

Example:

Objective: Reduce plastic pollution

Methodology: Collect, sort, and recycle plastic waste

Benefits: Environmental protection and profit generation

Report (R):

The proposal should be structured, persuasive, and clearly explain the value of the recycling initiative

Final Prompt based on R+T+C+F+R Framework:

Act as a business proposal writer. Write a professional proposal for “Recycling Plastic Waste” targeted at investors. Clearly include sections for Objectives, Methodology, and Benefits. Use persuasive and formal language to highlight environmental impact, feasibility, and potential business value.

O. Miscellaneous Useful Templates

43. Opinion Writing

Write an opinion piece on “Junk food”. Use persuasive arguments and examples.

Role (R):

Opinion Article Writer

Task (T):

Write a persuasive opinion piece on junk food

Context (C):

The piece should express a clear opinion about junk food, supported by logical arguments and simple examples

Few Shot (F):

Example: “Excess junk food consumption can lead to serious health problems like obesity and diabetes.”

Report (R):

The output should be structured, persuasive, and balanced with strong reasoning and examples

Final Prompt based on R+T+C+F+R Framework:

Act as an opinion article writer. Write a persuasive opinion piece on “Junk food.” Present a clear viewpoint supported by logical arguments and real-life examples. Discuss its impact on health and lifestyle, and use simple, convincing language to engage readers.

44. Debate Preparation

Prepare arguments for both sides of the debate: "Veg Vs. Non-veg"

Role (R):

Debate Preparation Expert

Task (T):

Prepare arguments for both sides of the debate: Veg vs Non-veg

Context (C):

The debate should include balanced points supporting vegetarianism and non-vegetarianism, suitable for a classroom discussion

Few Shot (F):

Example:

Veg side: "Vegetarian diets are healthier and more environmentally friendly."

Non-veg side: "Non-veg provides essential proteins and nutrients."

Report (R):

The output should be structured, balanced, and present clear arguments for both sides

Final Prompt based on R+T+C+F+R Framework:

Act as a debate preparation expert. Provide well-structured arguments for both sides of the topic "Veg vs Non-veg." Include clear points supporting vegetarianism and non-vegetarianism with simple reasoning and examples. Ensure the arguments are balanced and suitable for a classroom debate.

45. Travel Planning

Plan a 5-day trip to Greece for type of a single Adult. Include activities, budget, and tips.

Role (R):

Travel Planner and Itinerary Designer

Task (T):

Plan a 5-day trip to Greece for a solo adult traveler

Context (C):

The plan should include daily itinerary, activities, estimated budget, and practical travel tips

Few Shot (F):

Example:

Day 1: Arrival in Athens, visit Acropolis

Budget: €150–€200/day

Tip: Use public transport for savings

Report (R):

The output should be structured, practical, and include a clear itinerary with budget breakdown and useful tips

Final Prompt based on R+T+C+F+R Framework:

Act as a travel planner and itinerary designer. Create a detailed 5-day travel plan for a single adult visiting Greece. Include a day-by-day itinerary with major activities, an estimated daily and total budget, and practical travel tips such as transport, food, and safety. Keep the plan realistic, well-structured, and easy to follow.

46. Book/Movie Review

Write a review of the book "Orient Express".

Include plot summary, strengths, weaknesses, and recommendation.

Role (R):

Literary Book Reviewer

Task (T):

Write a structured review of the book "Orient Express"

Context (C):

The review should include plot summary, strengths, weaknesses, and a final recommendation for readers

Few Shot (F):

Example:

Plot: A mystery unfolds on a train journey

Strengths: Engaging storytelling

Weaknesses: Slow pacing in parts

Recommendation: Worth reading for mystery lovers

Report (R):

The review should be balanced, structured, and written in a clear and engaging tone

Final Prompt based on R+T+C+F+R Framework:

Act as a literary book reviewer. Write a structured review of the book "Orient Express." Include a brief plot summary, key strengths, notable weaknesses, and a final recommendation. Present the review in a clear, balanced, and engaging tone suitable for general readers.

47. Personal Development

Give me actionable advice on how to reduce weight organically, including daily habits and mindset shifts.

Role (R):

Health and Personal Development Coach

Task (T):

Provide actionable advice for natural weight reduction through habits and mindset

Context (C):

The advice should focus on healthy, organic weight loss using lifestyle changes, daily routines, and mental approaches

Few Shot (F):

Example: "Drink more water and reduce sugar intake to support natural weight loss."

Report (R):

The response should be practical, realistic, and include daily habits, dietary guidance, and mindset shifts

Final Prompt based on R+T+C+F+R Framework:

Act as a health and personal development coach. Provide actionable and practical advice on how to reduce weight organically through healthy lifestyle changes. Include daily habits, simple dietary guidance, physical activity suggestions, and important mindset shifts. Ensure the advice is realistic, safe, and easy to follow.

P. Prompt Chaining Examples

48. Multi-step Research Task

Step 1: Find out the top 5 causes of climate change.

Step 2: Based on those causes, suggest 5 practical solutions individuals can adopt.

Role (R):

Environmental Research Analyst

Task (T):

Identify the top causes of climate change and suggest practical individual-level solutions

Context (C):

The response should be structured in two steps: first listing causes of climate change, then mapping each cause to actionable personal solutions

Few Shot (F):

Example:

Cause: Fossil fuel burning → Solution: Use public transport or carpooling

Report (R):

The output should be clear, structured in two steps, and focus on practical, real-world actions individuals can take

Final Prompt based on R+T+C+F+R Framework:

Act as an environmental research analyst. First, identify and list the top 5 major causes of climate change. Then, based on each cause, suggest 5 practical and actionable solutions that individuals can adopt in their daily lives. Present the answer in a clear, structured format with simple explanations.

49. Idea to Execution

Step 1: Generate 5 business ideas for eco-friendly products.

Step 2: Pick one idea and create a marketing strategy for it.

Role (R):

Startup Strategy Consultant

Task (T):

Generate eco-friendly business ideas and develop a marketing strategy for the best one

Context (C):

The response should first list multiple sustainable business ideas, then select one strong idea and build a basic marketing strategy around it

Few Shot (F):

Example:

Idea: Biodegradable packaging

Strategy: Target eco-conscious brands, promote on social media, highlight sustainability benefits

Report (R):

The output should be structured in two steps, clear, practical, and focused on business viability and marketing execution

Final Prompt based on R+T+C+F+R Framework:

Act as a startup strategy consultant. First, generate 5 innovative eco-friendly business ideas. Then, select the most promising idea and create a simple marketing strategy for it. Include target audience, positioning, and promotional channels. Keep the response practical, structured, and easy to understand.

50. Universal Prompt Builder

[Role] + [Task] + [Context] + [Example]+ [Format]

Example: You are a nutritionist. Create a weekly meal plan for someone with diabetes. Include breakfast, lunch, dinner, and snacks. Format as a table.

Role (R):

Prompt Engineering Expert

Task (T):

Build a universal structured prompt using Role, Task, Context, Example, and Format

Context (C):

The user is learning how to design effective prompts and needs a reusable template for any task

Few Shot (F):

Example:

“You are a nutritionist. Create a weekly meal plan for someone with diabetes. Include breakfast, lunch, dinner, and snacks. Format as a table.”

Report (R):

The output should define a clean, reusable prompt structure that can be applied to any use case

Final Prompt based on R+T+C+F+R Framework:

Act as a prompt engineering expert. Create a universal prompt template using the structure: Role, Task, Context, Example, and Format. Ensure the template is reusable for any scenario and clearly explains what each section should contain so users can easily generate effective and structured prompts.
